

THE WORM JAR

Our observations and predictions on a worm's work.

1. Describe what we did to make the worm jar. Be sure to list all the things that were added to our jar.

2. What do you think will happen in the next two weeks?

3. Write three questions that you have about the worm jar.

~ I wonder...

~ I wonder...

~ I wonder...

2 WEEKS later...

The results of our worm jar experiment

1. Does the soil look the same after two weeks? How was it the same? Different?
2. What have the worms been busy doing? Do you see any tunnels?
3. What did the worms do with the food at the top of the jar?
